August 27, 2005

Dear Dr. Sahni,

Kindly accept my heartiest congratulations to you and the entire team that has worked on INDUS-II on the first successful transport of electrons around the ring.

2. It is indeed an important milestone and I wish more such professional successes for the CAT team in the years to come.

With kind regards,

Yours sincerely,

Anil Kakodkar

Dear Dr. Sahni,

I have just now received your letter of August 30th informing me about the milestone reached by Indus-2 with the first trial injection of the beam into the Storage Ring. Please accept my heartiest congratulations and kindly convey them to your colleagues. I shall eagerly look forward to further developments in Indus-2.

With kind regards,

Yours sincerely,

R. Chidambaram

Dear Dr. Sahni,

I received your letter of September 7, 2005 a couple of days ago. It was addressed to another Dr. M.R. Srinivasan (there are a number of us with identical names). The letter reached me accidentally. Please note my correct address given in this letter for any future need.

I am very happy to learn that the 2.5 GeV Synchrotron Radiation Source Indus-2 has been put to work and a 450 pA beam was circulated in the Storage Ring on August 27, 2005. I would like to send you and all your colleagues my congratulations and best wishes. I hope Indus-2 will fully serve the scientific and technology objectives it was designed for and will be a useful R&D facility for the DAE and the country.

I send you, your colleagues and their family my best wishes for success and health.

Yours sincerely,
M.R. Srinivasan (M.R.S.)
(Dr. M.R. SRINIVASAN)

GOVERNMENT OF INDIA
SCIENTIFIC ADVISORY COUNCIL
TO THE
PRIME MINISTER

MESSAGE

At the outset I congratulate you and your team of scientists to have successfully commissioned the Indus-2 accelerator recently. The excellence of technical capability of CAT as an institution has been demonstrated in the past during the design, development and commissioning of the indigenous Synchrotron namely Indus-1 during the late 90's. CAT has also been instrumental not only in designing and fabrication of variety of accelerators for medical and industrial applications but has also successfully designed and developed a variety of laser system for use in basic research and other areas. The visit to the Indus-2 facility during the meeting of the Scientific Advisory Council to the Prime Minister recently also brought out the role that CAT has been successfully playing in the area of manpower development to handle the various scientific and technological facets of such turnkey projects.

I, on behalf of the Chairman and Members of SAC-PM, place on record my appreciation for the scientific achievements of the Centre and my best wishes for the future.

Dear Dr. Sahni,

Thank you for your letter dated 30th August, 2005.

My congratulations for the progress that you and your colleagues have made with Indus-2. I hope CAT will be able to provide high quality Synchrotron Radiation beam very soon in future.

With regards,

Yours sincerely,

Dear Dr. Sahni,

It was a pleasure being at the Centre for Advanced Technology, Indore and particularly with you on 28.8.05.

2. The visit to the Synchrotron Radiation Source, Indus-1 accelerator and seeing that the Indus-2 functioning first time was a thrilling experience engineering complexities and the issues involved in making the high energy particle to pass through within a few millimeters have a large number of cycles and to accelerate to GeV level, is to be seen to believe. Each and every member of the Centre need to be congratulated for this very distinguished and unique achievement. Also, the efforts and leadership provided by you in this kind of complex technology is laudable.

3. Being a very unique facility on this part of the earth, I am very excited about the potential for scientific investigations as many high energy experiments are waiting to happen for this development.

4. Unfortunately, we did not have sufficient time to see other activities of the Centre, particularly the activity related to high energy Lasers but I am sure with equally challenging developments are taking place in Laser Technology also that would be yet another reason to visit the CAT again.

5. Once again congratulate each and every member of the team on my personal behalf.

With kind regards,

Yours sincerely,

No.VCC/CAT/SAC-PM/159 September 14, 2005

Dear Dr. Sahni,

During various meetings of SAC-PM in recent times, it was decided that SAC-PM should visit, if possible, various important and relevant centres where scientific activities are carried out at the highest level using mega and medium facilities.

Indore, CAT Centre certainly and eminently falls in that category.

My own impressions are formed out of fusion of my involvement quite intimately for quite a long time with our own departmental activities, CAT in particular, and of course as a member of the SAC-PM.

First, I was thrilled to see so much has been done by so many in so short a time. I was delighted beyond measure that on the very day SAC-PM visited CAT the electron beam at INDUS-2 had a fairly healthy go around. This is a tremendous achievement by any standard given the size of the operation. To just say "congratulations" is not enough - the milestone is a culmination of years of intense activities. I salute that resolve.

I was so excited to see almost each member of the SAC-PM present there Indore had "stars" and "twinkles" in their eyes.

BRAVO, CAT, ENCHORE

With best regards,

Yours sincerely,

MESSAGE

A visit to the laboratories and facilities at CAT- Indore, the sprawling and scenic campus built around the Sukh-Nivas palace and the lake, has always been an invigorating experience for me. The centre piece, the INDUS-2 storage ring has been making rapid progress. One can discern an enthusiasm and anticipation as the scientists and engineers are putting together an advanced accelerator technology, the first of its kind in India, involving the booster and storage ring, RF power systems, and magnets. Apart from the synchrotron facilities, R&D activities in laser and materials science and technology, in particular the front-line research on optical tweezers and bio-medical applications of lasers are very impressive. At IGCAR, we have benefited from expertise of CAT in the area of lasers, in evolving our R&D programs on distributed optic sensors, image plate reader, and laser based metrology.

First trial injection of the beam into the ring has been successful. It speaks of the competence and motivation of the team at IGCAR. This is truly a land mark event, and bears testimony to the conviction in our capabilities in indigenous growing the technologies. I wish you and the team all the success in the future, and look forward to fruitful collaborations towards the development and utilization of beam lines of INDUS-I and INDUS-2.

Baldev Raj

Dear Dr Sahni,

I am in receipt of your letter No. CAT/Dir/D/1-1/2005/258 dated 29th August, 2005.

I, on behalf of ECIL, am extremely happy to note that the Indus-2 has reached the milestone of completing the task of putting together the Storage Ring along with the Transfer Line-3 and the first trial injection of the beam in to the ring on 27th August, 2005 at 2110 hrs.

I believe this is one of the significant milestone in DAE programme and convey my hearty congratulations to you and your team.

With personal regards,

Yours sincerely,

(G.P. Srivastava)

September 10th, 2005

Dear Dr. Sahni,

I had often heard a great deal about Centre for Advanced Technology but never had the opportunity to visit the place. The SAC-PM meeting on 27 August at CAT gave me an occasion to personally see the Centre and get familiarized with the exciting work the Centre has been doing.

First, let me congratulate you and your colleagues for your dedication, expertise and achievements. I was very impressed with the successful development of the Synchrotron Radiation source, a technology development marvel meticulously implemented with a totally indigenous effort. It is heartening to note that so many multidisciplinary inputs went into the creation of this machine, such as high vacuum technology, high power RF, precision manufacturing, electronics, etc and that CAT has set up dedicated facilities and developed expertise in all these areas.

Having said this, I would like to add that existence of such pockets of excellence and the knowledge residing there is not generally communicated to the industry. It is possible that many industries in the country would have benefited by drawing upon the know-how and experience of CAT in these and other areas.

I understand that CAT also has developed various lasers and a variety of medical and industrial laser systems. Due to paucity of time I missed visiting the laser labs. Perhaps another time!

Please continue the good work you are doing. I can assure you that Samtel would be calling on you for assistance in our activities from time to time in future.

Thanking you

Yours sincerely

Dear Dr. Sahni,

I thank you for your letter No. CAT/Dir-D-1/2005/468 dated 30th August 2005. Heartly Congratulations to you and the entire staff of CAT, Indore for achieving this milestone of Indus-2.

It is indeed a great pleasure to know that the first trial injection of the beam into the ring commenced and 450 MeV beam circulated through the storage ring completing full 4 rounds. This is a great achievement in the Accelerator Technology and I am sure, it will go a long way in fulfilling the requirements of our scientists for further research.

I am also thankful to you for taking us for a round in the Indus-2 Facility during our visit to Indore in the first week of August 2005.

I once again wish you all the very best for achieving the milestone in this advanced technology area.
